AMERICAN FORK CITIZEN, SATURDAY, AUGUST 26, 1916.

NUMBER 19

DOLLAR DAY BIGGEST EVER

Sidewalk Pageant at 7:30 to be Followed by Fashion Displays on Living Models Will Be Novelties of the Evening.

Thursday, September 7th promises to be a day long to be remembered. It will be "Dollar Day" with the merchants. The underlying feature will be an exhibition of the season's fashions by the several business houses, under the name of "Big Fashion Show and Illumination Sale."

All the stores will be brilliantly lighted and be kept open until 10 p. m. Main and Merchant streets will be decorated and brilliantly illuminated with colored electric globes by the power company, and the merchants will add a number of lights to their display windows. All the fall and winter styles will be on display and in the big dry goods windows will be living models showing what will be stylish in hats, suits, dresses, cloaks, coats, shoes, etc.

The big event of the day will be the evening pageant on the sidewalks at 7:30 in the evening with Ben Fuller, LeGrand Noyes and Wayne Williams as marshals of the evening on bicycles.

Following is the order of the parade:

- 1—American Fork Silver Band.
- 2—Fashions of 50 years ago—1866.
- 3—Fashions of 25 years ago—1890.
- 4—Fashions of 5 years ago—1910.
- 5—Fashions of today—1916.
- 6—Baby display—go-carts, baby carriages, coaster wagons, etc., with babies in them.
- 7—Trades and industries by business men, many as we can get.
- 8—Freaks and Funny Features.

Patriarch Smith and Timothy McHenry will direct fashions of 50 years ago. John Hunter and Leo Shelly those of 25 years ago. T. S. Friday and the Greenwood long thin skirts of 5 years ago. J. A. P. Jensen, Mrs. Laidley, Thomas Robinson, Miss Garff and E. J. Seastrand those of the present day. L. S. Harrington, Joseph Walton and Reno Vance will direct the baby show. Ames T. Gard, William Thornton, E. H. Boley and John Robinson the trades, and Mrs. Osborne, Earl Varney, Vern Walker and Reed Gardner the freaks.

Immediately after the parade will be the demonstrations of this seasons fashions on living models in the big show windows.

In the afternoon there will be five sets of funny pictures free for kids under 12 in the Bronx and the silver band will discourse music while the crowds are gathering in the evening. There will be a big dance in the polo hall at night, and the best picture shows that can be found in town, our size, in the state.

Teachers and Assignments

That the kiddies may know we run a list of teachers employed in American Fork for the coming year and the grade they will occupy: Superintendent W. K. Hopkins, Primary Supervisor, Hermosa Peterson; Music Supervisors, Abraham Anderson and R. Overland.

American Fork High—P. M. Nielson, E. A. Morgan, J. M. Walker, M. O. Aughn, Earl S. Holmstead, G. Ray Allen, Eunice Jacobson, Robert L. Abby, Anna Mathison, Irving L. Matt, Joseph B. Forbes.

Miss O. Maughn has asked to be honorably released and action will be taken on his application by the board on Tuesday night. Also Miss Anna Mathison has asked to be released and her application has been granted and the board is expected to fill both positions at the session next week.

American Fork Grammar—Forbes School—Jesse E. Steele, Principal; Ray D. Nicholas, Jane McPherson, Charles Kershaw, Lillie Shipley, Leona Walker.

American Fork Primary—Harrington School—Mrs. A. L. Osmond, Principal; Blanche Crandall, Sarah Park, Lillian Clayton, Sylvia Thornton, Ella Wilson, Mary Blackhurst, Myrtle Peterson, Emma Peterson, Jennie Peterson.

Alpine School—George H. Dubois, Principal; Edith Devey, Rachel Kershaw.

Highland School—O. C. Day, Alice Miller.

WE PRINT BUTTER WRAPPERS.

PACIFIC MILL BEING RUSHED TO COMPLETION

Men Are Taken Out of Mine to Excavate for Mill and All Available Carpenters Are Being Put On—Will Be in Operation November 1st.

About twenty-five men are now busy grading the several benches, putting in concrete and erecting the buildings for the Pacific mill being erected on Dutchman Flat. All the men have been taken out of the Dutchman mine to assist in the excavation and all the available carpenters are being put to work.

It is expected that the mill will be ready to commence turning out concentrates by November 1st. The machinery, excepting one car load is already on the ground and this car is due to arrive from Denver any day. There will now be no delay till the plant is completed.

The mill will have a capacity of 65 tons daily and is being so constructed that additional units may be added, increasing its capacity. On the Pacific dump there is already sufficient ore to keep the mill going for one year and the big vein is said to have sufficient mill ore exposed to keep a plant of this capacity going for 10 years longer.

The Pacific is a sulphide ore and is ideal for concentrating. Very little power will be necessary for crushing. Tests made on the ore show that it will reduce down about 4 to 1 and then produce a shipping grade worth about \$50 per ton, which means a production of about 16 tons of concentrates daily. This will also make the extraction of high grade more convenient and Supt. Ferlin expects to materially add to his mining forest soon as the mill is completed.

BELOROPHAN SHOWING NOW SUBSTANTIAL

There is really "something doing" in the latest developments in the Belorophan. John Cleghorn, president of the company, who is down after inspection of the latest developments, said Wednesday that the tunnel, which had tapped the fissure at a depth of about 100 feet, had opened an ore body carrying lead, silver and a little copper, the total values being about \$25 per ton, and that while the extent of this body was yet undetermined it was "growing" with every shot.

But this is not the only good report from the mine. In making a raise from the tunnel to a shaft sunk from the surface the miners, when up about sixty feet, encountered a body of ore that is now about three weeks wide and carries as high values in silver as the body below, which appears to be a bedded vein and which has far more high grade galena than the ore in the fissure.

In order to afford quick and efficient ventilation this upraise was undertaken. Fifteen feet more of working will connect the raise with the shaft and then the ventilation problem will be solved, giving the miners the opportunity for the employment of three shifts without the necessity of installing a blower.

STRIKE MADE ON NEW PROPERTY

Property Recently Acquired by Judge King, B. L. Kershaw and William Hoffman Has 8 Inches of Shipping Ore.

William Hoffman, who with his son, is operating the property recently acquired by the American Fork Canyon Mining and Development Co., sent word down Saturday that he had just opened eight inches of shipping ore on a vein which he characterizes as being an extension of the Pacific fissure.

The property lies north-west of Peter Miller's Silver Glance group and northeast of the Bog mine. The strike of the Hoffman vein is north-west and southeast and if it conforms to Miller and Hoffman's theories it will upset the calculations of several other eminent authorities.

Besides the strike the American Fork Mining and Development Co. property has the biggest iron dyke in the Canyon that cuts the supposed Pacific fissure at right angles. Judge King, the Democratic candidate for Senator, is president of the American Fork Canyon Mining and Development Co.

POST OFFICE MAY BE MOVED

There is an agitation to have the post office moved from its present location on Merchant Street to one of the buildings on Main Street. The present lease expires in October. The Adamson building, formerly the Mint bar, or one of the Chipman buildings between the two banks have been mentioned as suitable buildings. An argument in favor of keeping the office in its present location is the fine fire and burglar proof vault now in use.

Since the talk of moving the building has been agitated, it has been suggested that a good location would be on the vacant corner south of the Chipman Merc. Company. A building specially suitable for post office purposes with a flood of light could be erected if a long time lease were signed.

Postmaster Clarke, when interviewed, stated that he favored moving to Main Street. He had not thought of using his own corner but had considered any location on Main Street satisfactory. Bids for the location will probably be submitted and an inspector will settle the question by his recommendation to the department.

FUNERALS HELD SUNDAY

The funeral services of Mrs. Ole Larson and Mrs. Alma A. Smith were held Sunday afternoon in the first ward meeting house.

Mrs. Larson's was held at 2 o'clock. Bishop James T. Gardner presiding. The opening prayer was rendered by James C. Healey of Alpine and the benediction by James Brown. The first ward choir rendered a number of selections, James Martin and daughter Mary, sang a duet and the Misses Mayberry and Sharp of Lehi, rendered a duet. The speakers were John H. Davis, Benjamin Ferrell of Alpine, Bishop Zabriskie of Highland and S. I. Goodwin of Lehi, and S. L. Chipman of American Fork.

Mrs. Alma A. Smith's was held at 4 o'clock, Bishop James T. Gardner presiding. The musical selections were furnished by the first ward choir, a solo by John H. Davis, a solo by Mrs. Chester Pulley and an instrumental selection by Prof. Chas. Hopkins. Thomas Featherstone, Sr., gave the opening prayer and Wm. Grant offered the benediction. The speakers were Dr. P. M. Kelly, James Martin and T. Abram Greenwood. Both were large funerals and many floral tributes were paid.

NEW HIGH SCHOOL PRINCIPAL ARRIVES

Prof. P. M. Nielson, the new head of the American Fork High School, arrived in American Fork with his family and is now comfortably located at home in the J. E. Jensen residence on First South Street. Prof. Nielson is delighted with this city and Utah County, which is his former home, he having been born in Pleasant Grove. He is a graduate of the B. Y. U. and has also been a student in the U. of U. and the U. A. C. For the past eight years he has been principal of the North Sanpete High School at Mt. Pleasant.

Mr. Nielson has a high reputation among the educators of the state. Speaking of the High School system he says:

Judging from the records of the American Fork High School and by a visit to the institution last spring, I think the school is in excellent condition and it is my desire and shall be my earnest endeavor to maintain the standard established by my worthy predecessor, Mr. Whitaker and his able faculty.

The outlook for the coming year seems very encouraging. There will in all probability be not fewer than 200 regular high school students in attendance besides 125 eighth grade or junior high school students, which together will constitute an excellent working unit.

The high school should be and is an institution that reflects the community life, preparing boys and girls as far as high school education goes, for the work that they are to do in life and as this locality is particularly agricultural one, that phase of our high school work should be emphasized.

The local high school will therefore endeavor to meet the needs of the community by training for a practical life and for a high standard of citizenship.

Fashion Show and Illumination Sale

Sept. 7th "Big Dollar Day" and Illumination Sale

From 8 a. m. to 10:30 p. m., on Thursday, Sept. 7th you will be able to get some of the best Bargains for \$1 that has ever been offered. Dollar bargains all day and all evening.

Fashion Show Parade at 7:30, immediately thereafter we will display in our windows and store rooms the fashions of the day up to the last word in stylish Suits, Coats and Apparel.

Living models to be used to display the goods. Styles of 1916 will also be in the Parade in the Evening.

Our coats are distinctively individual and we believe they will please the most prudent. You can get a full appreciation of our Suits and Cloaks without coming to see them, that is why we urge you to pay us a visit—though you may not be quite ready to purchase.

Fall and Winter Goods teaming in rapidly. Don't forget the Fashion Show Sept. 7, 1916

Chipman's Big Red Store

AMERICAN FORK, UTAH

CANYON NEWS

A. A. McCloud and B. Nielson came down this week from the Elta May property in the Silver Lake section, where they have four men at work developing a fissure that in the face of their tunnel shows a width of 7 feet. It is apparently good smelting ore. They had samples for assay and said that if the ore showed the anticipated values they would take steps looking toward the erection of a mill.

A strike was made the past week in the Live Yankee in a tunnel that the Greene Leasing Co. is running. Mr. E. C. Rabe, who is in charge of the work, is highly elated over the showing made. He has a nice pile of high silver-lead ore on the dump and is adding to it with each shift.

The ore was encountered on the contact between the shale and the quartzite. The mouth of the Yankee tunnel is but about 150 feet from the portal of the Belorophan bore and about fifty feet deeper. It means much to both properties. The work will be extended to the lime-shale contact, where it is expected the ore body will increase in size. The Yankee claim is but 200 feet in width and lies wedged between the Belorophan and the Globe Con. Thousands of dollars worth of float has been picked up on the Yankee ground and it is thought veins being now opened on it and the Belorophan are the sources of this float.

Engineers were up the Canyon this week surveying the Amarville and Non Compromise claims that have recently been taken over under a bond and lease by Salt Lake parties. Several men have already been put to work. These claims both contain some good ore in promising fissures. They were patented in 1888 but have had no work done on them since that date.

Two men from Springville went up the Canyon and are now busy driving a tunnel on the Miller Hill Extension group lying at the head of the McEllen Gulch, above the Live Yankee. They claim to have the same vein that the Yankee has.

Senator Wootton came down from the South Park property this week with the information that Tuesday he had started some men running a tunnel

which in 150 feet will cut at depth a promising fissure showing values of lead and silver on its outcrop, 200 feet above. The tunnel will cut the vein in the soluble lime where the Senator expects to encounter a body of shipping ore. The South Park is running the biggest tunnel in the canyon. It is pursuing a course into the hill 10 degrees east of north and will ultimately be about a mile in length. Three fissures will be cut by this tunnel and several side fissures will be prospected from it. Work on this tunnel will continue without interruption.

Work will be resumed Sept. 1st on the Pacific Extension property, lying between the Bay State and the Osborne, east of the Pacific. Some recent assays of a fissure on which

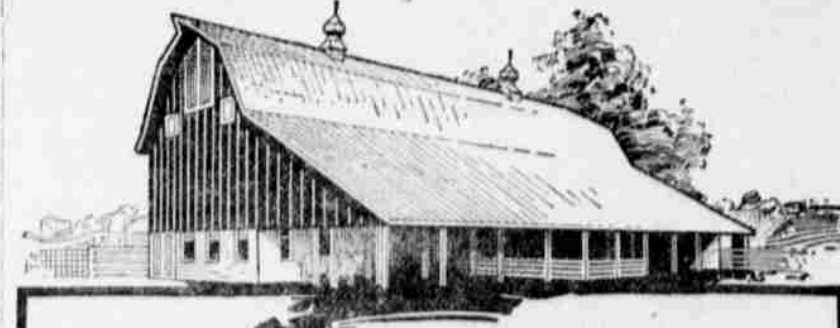

some work was done shows values in lead and silver. It is here that men will be put to work.

THE TIME TO KILL THE FLY IS NOW

Wage constant warfare against this silent worker whose presence means filth and germs, the insect whose insolence and self-assurance exceeds that of any other animal in the world.

HORSE RACERS GET AWAY.

The two men who last week were on the streets Sunday night, refused to stop when demanded by a juvenile officer. Even after a shot was fired by the officer they refused to stop and their identity has not yet been learned. They were last heard entering Pleasant Grove.

Just Like a Gold Bond

A good cattle barn begins to earn money for you from the day it is completed. And the returns keep coming in year after year without interruption.

Look at the building shown in the picture. It is one good suggestion for a profit-earning cattle barn. You will see from the illustration that it is designed for a good sized herd and it has plenty of room for hay overhead.

Notice, also, the shelter shed, arranged by an extension of the main roof. The cattle appreciate this protection from the weather. When the cattle gain in weight, you gain in money.

Let us help you with your plans for a new cattle barn. There is a certain best material for cattle barns just as there is for all other farm buildings.
